  Examples of descriptive terms include:
  Grain size—Boulders, gravel, sand, silt, clay.
  Hardness—Loose, soft, tight, hard, very hard.
  Color—All materials. Most critical in sedimentary rock.

- 10. The density of the grout slurry must be reported and may be indicated as pounds per gallon, gallons of water per sack, total gallons of water and number of sacks used, etc. Specify the grout placement method, i.e. tremie pipe or positive displacement. The percentage of additives mixed with the grout should be reported under remarks.
- 11. Record the type and the amount of disinfection used, how placed and the length of time left in the hole.
- 12. Report well test data as required by Rule 10.7. Spaces are provided to report all measurements made during the test. The report should show that the test complied with the provisions of the rules. If a test was not performed explain when it will be done. If available, report clock time when measurements were taken.
