CRP COVER MAINTENANCE

CRP cover must be maintained in a manner consistent with CRP policy and the Field Office Technical Guide. Mowing for cosmetic purposes or generic weed control is prohibited.

Operation and Maintenance

After the Final Status Review (or a maximum of 3 years after planting), maintain the planting according to your CRP conservation plan. Maintenance activities are allowed only if necessary to maintain stand health or diversity, or to control pests that damage CRP cover or adjacent lands. Noxious weeds, such as Canada thistle and Johnsongrass, must be controlled. Additional information can be found in the *2006 Weed Control Guide for Ohio and Indiana* - Bulletin 789, Publication # WS16 (<http://www.btny.purdue.edu/Pubs/WS/WS-16/ProblemWeeds06.pdf>)

Mowing for generic weed control or for cosmetic purposes is strictly prohibited.

Maintenance activities, such as herbicide applications, are NOT allowed from April 1 through August 1 to protect ground-nesting wildlife during the primary nesting and brood-rearing season. If maintenance activities are needed at times other than these, the FSA County Committee must approve the maintenance activity prior to the activity occurring. Maintenance activities should be conducted on a "spot" basis only.

Haying / Grazing

Haying/grazing is not allowed for continuous CRP practices. Exclude all acres from haying and grazing year round. Fences may need to be constructed and maintained to exclude livestock the entire year.

The contract area cannot be used for field roads or other uses that damage or destroy the cover.

OPERATION AND MAINTENANCE

Maintenance activities are allowed only on a spot basis and only if necessary to maintain stand health, maintain stand diversity, or control pests that will damage the CRP cover or adjacent lands.

✓ **Inspect** the practice on a seasonal basis and following major storm and runoff events. Any damages or sediment accumulation that would adversely impair the function of the practice must be corrected.

☐ **Potential Unapproved Vegetation** likely to encroach on your site includes
Recommended Control Method(s):

☒ **Mowing***: only allowed when used as a preparation method for Mid-contract Management practices, such as prescribed burning or strip disking, or as needed for operation and maintenance of grass practices.
Mowing for Generic Weed Control or Cosmetic Purposes is prohibited.

☐ **Native Grass = 12" MINIMUM Mowing Height***

☒ **Non-Native Grass = 4" MINIMUM Mowing Height***

☐ **Prescribed Burning**: according to an approved burn plan, and as a method to control volunteer trees and brush.

☐ **Other**:

* **NOTE**: Weed control and other maintenance activities will not be conducted from **April 1 to August 1**. All activities will be on a "spot" basis only, unless prior approval is granted by the FSA County Committee.

MID-CONTRACT MANAGEMENT (Grasses only) STARTING IN YEAR:

☐ The predominant cover consists of woody vegetation, or is a grassed waterway, so Mid-Contract Management is not required.

☐ **Prescribed Burning** ☐ **Strip Spraying** ☐ **Strip Disking** ☐ **Inter-seeding**

☐ The Specific Mid Contract Management Activity will be decided by the participant in the scheduled year based on condition of the vegetation, site considerations, capabilities of the participant, etc.

✓ Treatment will not occur more than once every 3 years on the same acreage. Reimbursement will be dependant on the activity(s) performed based on local FSA Not-To-Exceed rates.

For CRP Mid-contract Management specifications see:
<http://www.in.nrcs.usda.gov/programs/CRP/crphomepage.html>

ADDITIONAL INFORMATION

REQUIRED ACTIONS

See the attached specifications sheet for any required actions. Any actions must be completed within one (1) year after CRP Re-Enrollment contract approval.

OPERATION and MAINTENANCE

- Vegetation will be maintained according to your CRP conservation plan.
- Maintenance activities are allowed only if necessary to maintain stand health or diversity, or to control pests that may damage the CRP cover or adjacent lands.
- In grass or grass/legume plantings, volunteer brush and trees should be controlled by use of prescribed burning (with an approved burn plan), spot disking, or spot spraying.
- Noxious weeds (such as Canada Thistle and Johnsongrass), and unapproved species (such as Autumn Olive, Bush Honeysuckle, Multiflora Rose, Reed Canarygrass etc.) must be controlled. Additional resources include:
 1. *2006 Weed Control Guide for Ohio and Indiana* - Bulletin 789, Publication # WS16

 2. Noxious and Invasive Weeds and The Weed Laws in Indiana
<http://www.btny.purdue.edu/weedscience/2005/WeedLaw05.pdf>
- Maintenance activities will be conducted on a **"spot" basis only**.
- Maintenance activities are not allowed from **April 1 - August 1** to protect ground-nesting wildlife. If maintenance activities are needed within these dates, the FSA County Committee **must** approve the maintenance activity **prior to** the activity occurring.
- **Mowing is only allowed when used as a preparation method for Mid-contract Management practices, such as prescribed burning or strip disking, or as needed for operation and maintenance of grass practices.**
- **Mowing for generic weed control or for cosmetic purposes is strictly prohibited.**

- All acres should be excluded from haying and grazing year round, unless authorized.
- The contract area may not be used for field roads or other uses that will damage or destroy the cover.
- **Inspect** the practice on a seasonal basis and following major storm and runoff events. Any damages or sediment accumulation that would adversely impair the function of the practice must be corrected.
- **Replace** dead trees and shrubs or grass as needed to insure that the practice functions as intended.
- Protect the drainage area above the practice against erosion to the extent that expected sedimentation will not shorten the planned effective life of the practice. Consider such practices as Residue Management (No-Till, Mulch Till, etc.), Conservation Crop Rotation, Contour Farming, Cover Crops, etc.

MID-CONTRACT MANAGEMENT

All new CRP contracts must include scheduled mid-term contract management activities that are site specific and will ensure plant diversity, wildlife habitat, and protection of soil and water resources. Management activities that will ensure these benefits include prescribed burning (according to an approved burn plan), strip disking, strip spraying, and inter-seeding of legumes. All management activities must be performed according to Natural Resources Conservation Service (NRCS) Standards and Specifications as found in the electronic Field Office Technical Guide (eFOTG) and CRP policy.

Mid-contract Management Practices for practices originally planted to trees are not required unless requested by the participant and included in a management plan.

Mid-contract Management Practices are not required for grass waterways.

If using herbicide for any purpose, work with a local consultant or Purdue Extension Specialist to determine the best herbicide combination and timing. Follow the manufacturer's label rates and guidelines when applying herbicides.

Noxious and unapproved Species – Additional Information

NOTE: control of the species identified in your plan must be initiated within the first year of CCRP Re-Enrollment contract approval. Since these species have a tendency to re-appear from seed and other methods, annual monitoring and follow-up control efforts are required to ensure the species are controlled to and maintained at the acceptable levels described in your plan. Follow-up efforts are not be eligible for cost-share.
